# WATERSTOP SL – BALL VALVE FOR THE SOLA-TECS C

The Ball Valve for the SOLA-TECS C, made of nickel-plated brass, is inserted between the SOLA-TECS C and the lance bend.

This means that the water inflow can be stopped at any time via the ball valve. It is, therefore, a perfect solution for working over a short distance.

## Special features

- perfect complement to the SOLA-TECS C
- stops the water flow
- straightforward operation
- professional quality

## Technical data

Material	Brass nickel plated
Wing grip	Aluminium
Max. operating pressure	210 bar
Max. temperature	80 C°
Inlet	M 22 x 1.5 outer thread
Outlet	M 22 x 1.5 inner thread with hexagonal nipple
